

Pepcast.com

A new exciting way to create and share Photo Albums

Pepcast is a new photo sharing and organizing experience. You can create web photo pages the way you want them, free of charge. Web

albums and slideshows are automatically generated. Easy upload, organization, and sharing. Email photos, albums, and slideshows. All in one service. Just go to www.pepcast.com

Key Features

Upload multiple files & Organize them

Creating your own web album is fast and easy. You can upload several pictures at once to create your own web albums. Use the Web Organizer to change the picture order or rotation and to add titles and descriptions to your pictures. You can create multiple albums for events, parties, etc.

Personalize your albums

Personalize your web album - the possibilities are limitless. Choose a starting theme/skin, and then modify it to fit your personal style. Change the background, text color, add a logo, even change the page margins and incorporate multiple background pictures! There are many predefined themes ready to use.

Join & Create Communities

Communities are a new way for you to share your photos with others with a common interest. Featuring an album in a community allows others browsing that community to see your pictures. Don't see a community that matches your interests? Create your own! E.g. hobbies, sports, research, industry or any other topics.

Share your stuff (or don't!)

You choose whether you'd like to share your photos with others or limit access. Choose your share settings for each album: social (listed in your community), public (available to all your friends), and private (restricted access with a secret link that only you know).
